Summary

Full Stack Web Developer specializing in M.E.R.N. stack applications. Proficient in using current Web Development technologies. As a recent graduate of the University of Pennsylvania LPS Coding Boot Camp, the completion of the rigorous school program proves the ability to meet deadlines as well as strong ability to learn new technologies on the fly. For years has been applying computer science knowledge to make interactive art and developing game prototypes. Continues to be an accomplished real time media designer and video jockey. Has performed and presented artwork with some of the worlds top musical acts and DJ's. In the last three years has been invited to lecture at NYU Tisch School of the Arts on the subject of creating real time visuals with code. As a new graduate of UPenn's LPS Coding Boot Camp, I am looking forward to applying my new skills to web development projects.

Skills

Programming Languages: JavaScript, CSS, HTML, C#(Unity3d), Java(Processing)

Frameworks: React.js, Node.js, Handlebars.js, Express.js, jQuery, Materialize, Bootstrap, Processing, P5.js, Three.js

Databases: MongoDB, MySQL

Tools & Technologies: Git, Unity 3D, Quartz Composer, Adobe Photoshop, After Effect, and Premiere, Cinema 4D, VDMX5

Code Samples & Projects

Wall to Wall Depot

Github: <https://github.com/Jdelorim/wall2wall2>

Mirrored Deployed Site: <https://wall2wall2-jd.herokuapp.com/>

Login: wall2walltester@gmail.com **Password:** wallrooter

A Full Stack web application for Wall to Wall Custom Design Management. Wall to Wall Custom Design Management hired me to engineer a online ordering system for their cabinet products. The site features secure login and user account creation, a variable menu for ordering the products, email system for letting users know the status of their accounts and orders. It also features a content management system so the company can process the orders and update or change user information.

Technologies used on this project: Node.js, Express, Handlebars, JavaScript, CSS, MongoDB/Mongoose, SendGrid API, Passport.

Digital Arts Scraper

Github: <https://github.com/Jdelorim/DigitalArtsScraper>

Deployed Project Site: <https://digitalartsscraper.herokuapp.com/>

A Full Stack application that scrapes articles from Digital Arts Magazine. The user can save favorite articles as well as comment and delete them. Technologies used on this project: Node.js, Express, MongoDB, jQuery, Handlebars.js, JavaScript, HTML, CSS.

Memory Game

Github: <https://github.com/Jdelorim/memorygame>

Deployed Project Site: <https://jdelorim.github.io/memorygame/>

A Front End React.js web application that is a memory game. Click on each character without repeating each time you pick one the cards reshuffle. Technologies used on this project: React.js, CSS, HTML, JavaScript(ES6 features).

Education

- **Penn Coding Boot Camp (certificate)** - Full-Stack Web Development

University of Pennsylvania 2018

A rigorous 24 week program to build dynamic end to end web applications.

- **Video Symphony (certificate)** - Motion Graphics/Film editing

Burbank, CA 2006 - 2007

A year program to learn and master film editing and post production in the film industry.

- **Wilmington University - BS** - Motion Graphics and Design

Wilmington, DE 2001 - 2005

Earned a Bachelor of Applied Science degree in Multimedia and Design.
